CONTENTS

No. 1 MARCH, 1927

AMERICAN ASSOCIATION OF ANATOMISTS, FORTY-THIRD SESSION:

Abstracts 1

Demonstrations 52

No. 2 APRIL, 1927

AMERICAN ASSOCIATION OF ANATOMISTS, forty-third session: Proceedings, Officers and List of Members 55

FRANK BLAIR HANSON AND FLORENCE HEYS. Differences in the growth curves of albino rats born during the four seasons of the year under uniform laboratory conditions. Two figures 83

S. R. DETWILER. Medulla injury in relation to cellular proliferation in Amblystoma embryos. One figure 91

ALDEN B. DAWSON. The various elements in the epithelium of the fundic mucosa, with special reference to those cells whose entodermal origin is doubtful..... 99

ADVANCE NOTICE from the section for experimental cytology of the Tenth International Congress of Zoölogists at Budapest, 1927..... 109

M. R. DRENNAN. The homologies of the arm and leg. Eight figures 113

FRANKLIN P. REAGAN. The supposed homology of vena azygos and vena cava inferior considered in the light of new facts concerning their development..... 129

No. 3 MAY, 1927

W. P. Covell. A quantitative study of the Golgi apparatus in spinal ganglion cells. Four figures 149

H. E. Jordan and J. P. Baker, Jr. The character of the wall of the smaller blood vessels in the bone marrow of the frog, with special reference to the question of erythrocyte origin. Four plates (twenty figures) 161

Henry K. Seelaus. On certain muscle anomalies of the lower extremity. Two figures. 185

Walter E. Sullivan and Carrol W. Osgood. The musculature of the superior extremity of the orang-utan, Simia satyrus. Eleven figures 193

Richard E. Scammon. The literature on the growth and physical development of the fetus, infant, and child: a quantitative summary. Eight figures 241

Richard E. Scammon and Gordon H. Scott. The technique of determining irregular areas in morphological studies. Two figures..... 269

No. 4 JUNE, 1927

H. E. Jordan and Guy W. Horsley. The significance of the concentric corpuscles of Hassall. Seven plates (forty-five figures) 279

Robert H. Bowen. Golgi apparatus and vacuome. Two figures 309

Wen-chao Ma. A method for the demonstration of the intracellular secretion canaliculi of the parietal cells of mammals 337

Earl Theron Engle. Polyovular follicles and polynuclear ova in the mouse 341

Francis F. Schwentker. A group of small cells in the hypoglossal nucleus of man. Two figures 345

J. M. Essenberg. Cross-section container of aluminum. Five figures 357

Homer B. Latimer. Correlations of the weights and lengths of the body, systems, and organs of the turkey hen 365

James O. Foley. Observations on germ-cell origin in the adult male teleost, Umbra limi. Two plates (twelve figures) 379
